CAREER OBJECTIVES

Experienced frontend developer who is highly skilled in converting UI/UX mockups to responsive and optimized web pages using HTML, CSS and JavaScript.
I enjoy working in a team but I can run projects on my own as well.

WORK EXPERIENCE

Frontend Developer & WordPress Developer

Jevic Integrated Services | Remote | March 2020 – current

Work with a team of UI/UX designers, content writers, graphic designers and social media experts to create and manage websites and social media channels of brands leading to an increase in the number of Website interactions by 65%.

Frontend Developer & UX Writer

Get Fresh Nigeria Ltd | 4 months Contract | August 2020 - December 2020

- Worked with a team of product designers and backed developers to Create a web app that allowed users order delivery service in comfort. This app also allowed them to track their packages at every point in time thereby increasing the company's reach by 50%. This was achieved by consuming an APIs that allowed the users tracking ID to communicate with the Admin Dashboard.
- Worked with the UI/UX team during the design process, to draft contents that properly guide users to use the getfreshexpress web application without much guidance.

PROJECTS

Jevic Website: a company prototype website (HTML, CSS & Vanilla Js)
Node Newsletter: a newsletter sign-up page (NodeJS, ExpressJs, MailChimp API integration, HTML, CSS and materialize CSS framework)
